

**Neuroscience.** The University of Nebraska at Omaha (UNO) seeks applications for a tenure-track ASSISTANT PROFESSOR position to begin Fall 2013. A Ph.D. in neuroscience, biology, psychology or related field and postdoctoral experience are required. *The area of research emphasis is open, but we encourage applicants with interests in basic neuroscience related to processes of infectious disease, immunology, and/or endocrinology (e.g., psychoneuroimmunology) that would complement existing strengths among the faculty and would be consistent with the NIH-INBRE program ([www.unmc.edu/inbre/about.htm](http://www.unmc.edu/inbre/about.htm)). Links to INBRE can provide substantial funding opportunities to facilitate the development of a successful and externally-funded research program.* We seek candidates that are committed to research and show promise for developing an externally funded research program, and that utilize molecular and/or cellular techniques to address fundamental questions in systems neuroscience. Mentoring of undergraduate, Masters, and PhD students in research is expected. The teaching commitment will be 50% and will include participation in the Intro to Neuroscience course, and advanced undergraduate and graduate courses in the area of expertise. The tenure home for the successful candidate will be either Biology or Psychology, depending upon scientific background and the candidate's preference.

The Neuroscience Program is an interdisciplinary B.S. major, one of the most rapidly growing programs at the UNO. At the graduate level, we offer Masters degrees in Psychology and Biology, and a PhD in Neuroscience and Behavior. Our facilities include recently renovated classrooms, research laboratories, and vertebrate animal facilities. In addition to the resources in the Departments of Biology and Psychology, opportunities for collaboration in teaching and research are available at the University of Nebraska Medical Center (2 miles from UNO) and the University of Nebraska Lincoln (50 miles from UNO). For additional information, please see the program's website at [www.unomaha.edu/neuroscience/](http://www.unomaha.edu/neuroscience/). Apply for this position at [www.unomaha.edu/humanresources/employment.php](http://www.unomaha.edu/humanresources/employment.php). Attach a cover letter, curriculum vitae, statement of teaching objectives, and statement of research objectives to the electronic application. Please arrange for three letters of recommendation, either emailed to [jfrench@unomaha.edu](mailto:jfrench@unomaha.edu) or sent to Dr. Jeffrey A. French, Neuroscience Director, Allwine Hall 419, University of Nebraska at Omaha, 6001 Dodge St., Omaha, NE 68182. Review of materials will begin 15 October 2012 and continue until the position is filled.

**The university and department are strongly committed to achieving diversity among faculty and staff. We are particularly interested in receiving applications from members of under-represented groups and strongly encourage women and persons of color to apply for this position.**
